

A Discouraging Diagnosis

Acute pneumonia complicated by smoking led me to fear the worst about my mother's state of health.

06/04/2021

On December 30, 2019, my mother became seriously ill; she had acute pneumonia with lung complications from smoking. The doctor's diagnosis was very discouraging and my mother was between life and death. I asked Blessed Guadalupe for a miracle: to cure my mother

completely. At her last appointment, the doctor ran a test and her lungs were clear! With due care, of course, my mother is going to be able to live a normal life.

I thank Blessed Guadalupe for interceding for me and my mother, and ask her to keep my mother healthy for many years to come.
